Additional Information

Description:

This aptly named tender perennial will add a taste of mushroom to salads and sandwiches, becoming stronger in flavour when added to cooked dishes at the last minute of cooking. A good edible houseplant with its thick, glossy, dark green edible leaves which have a crispy texture, similar to spinach. Plants will also produce showy little blue flowers in the late summer.

Growing Information:

Take out of box, water, keep moist, plant out after frosts and feed occasionally.

Overwinter indoors by cutting the plant down to 15cm tall in the autumn before frosts.
