Height/Spread: H 51-60cm S 21-30cm

Aftercare: Easy

Sow/Plant: March-early June and September

Harvest/Flowers: July-September and April-June in year 2

Awards: Fleuroselect

Additional Information:

Description: A total game-changer for poppies as they are grey/blue, just LOOK at them! Single and semi-double flowers in shades of silvery grey and slate blue, some with a red-rimmed eye. Plants are vigorous and free flowering. After flowering, the seed pods can be left to self-seed or feed the birds in autumn/winter.

Growing Information: Sow the seed thinly 3mm deep direct into finely raked, moist, warm, weed-free soil where the plants are to flower. Germination usually takes 10-14 days. As the seedlings develop, thin them gradually to achieve a final spacing of 15cm (6"), removing any competing weeds. Remove dead flower heads as they appear. Poppies will grow readily in most garden soils in a sunny position.
