20 02 52		1	3 x 9cm Potted Plant	£24.00	

Other information

Genus: Polonium

Family: Caeruleum

Variety: Golden Feathers

Special Features/Notes: Breeding results in a brand new easy to grow showstopper! Featuring mauve flowers and striking foliage, broad leaf margins edge each leaf in a stunning gold, making it possibly the most variegated and therefore coloured foliage variety of Polemonium there is, perfect for a garden border or pot.

Soil type: Good moist but free draining garden soil

Where to grow: Containers, Beds & Borders

Type of plant: Perennial

Cut Flower: Yes

Climate: Prefers full Sun or partial shade

Flower/Veg colour: Purple

Main Foliage Colour: Multi

Hardiness: Fully hardy

Height/Spread: 40-50cm/30-40cm

Aftercare: Easy

Sow/Plant: May onward

Flowers: April-June

Additional Information

Description: The bright golden variegation on this brand-new perennial makes it a real showstopper. The broad golden edge to each leaf is what helps make this plant unique and stand out in the garden all season - even when not in flower. The lavender or lilac-coloured flowers are set off wonderfully by the foliage and appear in spring and last a couple of months.

Polemonium Golden Feathers started life in 2016 in a production batch of Polemonium Lambrook Mauve. The clean and strong variegation stood out in the batch catching the plantsman's eye so the first plant was put aside for observation with little expectation that the variegation would be stable. As this plant grew the variegation held firm and the ensuing plant was indeed a striking specimen - especially when the mauve flowers of its progenitor were displayed delightfully against the bright variegation. So, multiplication was the next test, and this proved highly successful with divisions holding the variegation well and growing into handsome plants.

Growing Information: Grow in fertile, moist but well-drained soil in full sun or partial shade. Water regularly in spells of dry weather and once flowering has finished cut back the flowering shoots to ground level.
