**Hardiness:** Hardy

**Height/Spread:** 50-60cm/40-50cm

**Aftercare:** Easy

**Plant:** All year round

**Flowers:** July to September

**Awards:** n/a

## Additional Information

**Description:** The deep purple flowers which are produced from dark purple almost black buds are unlike any other agapanthus. This evergreen variety also re-blooms allowing it to flower for a much longer period. And just when you thought it couldn't get much better, this new variety also bulks up quicker than many varieties, which will result in more flowers over time.

**Growing Information:** Plant your Agapanthus in well-drained soil, in a place that receives sun for most of the day. Plant 30cm apart in the ground or in pots. Feed weekly or fortnightly with a balanced liquid feed during the growing season until flowers begin to show colour. Keep plants moist until autumn, after the flowers start to fade, to encourage the development of new flower buds. Mulch in autumn or cover the crowns with straw or horticultural fleece to protect from frost.
